Subject: Health & Wellness 5km Walk/Run with ParticipACTION

North Shore Health Network Foundation is currently collaborating with ParticiP ACTION on an exciting initiative aimed at promoting health and wellness within our community.

As part of this initiative, we are planning to organize a 5km walk/run for fun, focused on encouraging physical activity and community engagement. One of the key aspects of our proposed route is to include a loop around the hospital. We believe this would not only provide a scenic and enjoyable route for the participants but also allow patients at the hospital, as well as and Residents at Golden Birches, to witness the fun.

However, we understand that such a route may necessitate road closures or temporary adjustments to ensure the safety and convenience of all involved. Therefore, I am reaching out to inquire about the process for setting up road closures or any necessary permits to facilitate this event.
